desipramine (Norpramin®)	1,6,8
doxepin (Sinequan®)	1,6,8
duloxetine (Cymbalta®)	1,6,8
imipramine (Tofranil®)	1,6,8
nortriptyline (Pamelor®)	1,6,8
vortioxetine (Trintellix®)	1,6,8
fluvoxamine (Luvox®)	1,4,6,8
paroxetine (Paxil®)	1,4,6,8

Why Integrate?

Save staff time by enabling orders directly within your EMR.

Increase portability of results: results are delivered directly back into your EMR and visible to all providers across your organization.

Improve patient experience: results can be sent directly to patients via your EMR's patient portal.

 athenahealth

 Epic

1. Greden JF, et al. Impact of pharmacogenomics on clinical outcomes in major depressive disorder in the GUIDED trial: A large, patient- and rater-blinded, randomized, controlled study, Journal of Psychiatric Research (2019), doi: <https://doi.org/10.1016/j.jpsychires.2019.01.003>.

What are the Steps for Integration?

Let your GeneSight sales representative know you're interested in integrating with Myriad.

We will collect some basic information and submit a request to the Myriad Clinical Integrations team.

Myriad's Clinical Integrations team will coordinate with you and your GeneSight sales representative to create an implementation plan & timeline.

What is Required From the Clinic?

For the integration, Myriad will need an understanding of:

Your preferred clinical workflows for GeneSight

Clinic names and addresses for integration

Basic information for your providers and staff

We will work directly with your EMR vendor to enable the integration.

Lastly, we will conduct end-to-end testing with your IT team to ensure the integration is functioning properly.

Reach out to your GeneSight sales representative for information on the EMR integration process.
